Acuitas Therapeutics Honoured With Philanthropic Award

Vancouver, B.C. – On November 15, 2024, Acuitas Therapeutics, Inc. received the Association of Fundraising Professionals (AFP) Greater Vancouver Chapter’s Giving Hearts Award: Outstanding Corporation. Acuitas was nominated by their community partner, Science World, in recognition of their philanthropic contributions and employee led support of the Vancouver community.

In 2022, Acuitas entered into a long-term partnership with Science World, concentrating on human health, enriching education and promoting science, technology, engineering, the arts and math (STEAM) – with a focus on young people, especially young women. The Acuitas team actively participates in Science World’s Girls and STEAM, Future Science Leaders, and Super Science Club events to help inspire the next generation of innovators.

Below is an executive summary of the nomination submitted by Science World:

“Since January 2022, Acuitas has consistently exceeded our expectations of a partner, eagerly signing up for new opportunities and passionately sharing our mission. In a few short years, Acuitas’ lifetime giving to Science World has reached \$1 million. Allocating 1% of their global revenues to social and environmental causes, Acuitas’ impact extends far beyond Science World, positively affecting every community organization they engage with across B.C. Their philanthropy goes beyond financial contributions as they offer their employees two paid workdays annually for volunteer activities. They enhance our programs by connecting students with a diverse array of STEAM experts and leaders, including their own team members. As a relatively small company, Acuitas’ involvement sets a powerful example for other partners, inspiring them to deepen their commitment.”
